## **After optimizing the management of the Ufimsky indpark, maintenance costs decreased by 48%**

After the optimization of the management of the Ufimsky industrial park, the costs of its maintenance decreased by 48%, respectively, the tariffs for residents decreased, General Director of the Development Corporation of the Republic of Bashkortostan Nail Gabbasov said at an operational meeting in the government. Outsourcing contracts with the companies that provided the service were terminated, and the staff hired all the necessary personnel for this - security guards, electricians, plumbers.

Roads, their lighting, a garage, water pumping and sewerage stations, power supply networks are being built in the park, a bypass is being designed (a backup path through a railway crossing).

The largest facility is an industrial complex with an area of 20 thousand square meters. m, implemented as part of the national small business project. "Despite the winter time, we managed to make up for lost time in half a year, the building is planned to be commissioned in the third quarter of this year," Nail Gabbasov said.

All this will make the industrial park more attractive for working and future investors, the Director General of the Kyrgyz Republic of Belarus believes. There are preliminary agreements with four potential residents (with a total investment of about 900 million rubles), the Director General of the Kyrgyz Republic informed.

Now the industrial park "Ufimsky" is 91% full. There are 19 companies located here: 11 tenants and 8 land owners. Anchor group - enterprises of the Kronospan company.
